

INTRANAV Paperless Factory Starter Kit

Test the **INTRANAV.RTLS E-Ink TAGs** for paperless logistics & production

Digital manufacturing information for intelligent production control

The use of digital paper or so-called E-Ink displays can drastically reduce operational costs (OPEX) in manufacturing and intralogistics and optimize processes. A significant advantage in the combination of an E-Ink display/TAG with the **INTRANAV.IO** platform is not only the elimination of conventional paper lists, receipts, order papers, but also the possibility to adapt content dynamically and in real-time in the process. Thus, instructions for employees and important information for shippers can be dynamically synchronized based on changes in the management system as well as on the E-Ink TAGs.

We offer you completely new possibilities to implement and control your workflows.

Saving costs with the paperless factory

- Eliminate printing infrastructure and print media
- Eliminate operational workflows (creating lists, printing,...)
- Reduce process errors due to real-time process blocking

Further usage in combination with the INTRANAV Software suite

- Dynamic information such as inventory and product information
- Control of work processes through instructions in real-time on the display
- Pick-To-Light function with picking instructions for better order picking
- Connection to EMS/ERP/WMS systems for visualization of relevant order information and number ranges
- e-Kanban with button to initiate a replenishment process
- Real-time location of E-Ink displays to show exact location information

Scope of delivery - Starter Kit

10 different sizes of E-Ink TAGs are included

32 INTRANAV.RTLS E-Ink TAGs
in a practical suitcase

Features

- E-Ink manufacturer-independent coupling
- Geofence based change of content (location)
- Customizable function of LED and button
- RGB LED and multiple display colors available
- Simple infrastructure (1 gateway for 3000m² area)
- Available for sub-GHz and 2.4GHz
- Waterproof and robust

**Your INTRANAV Paperless Factory
Starter Kit is available for**

1.900,- €
